

OPERATIONAL COLLABORATION SOLUTION

Your Mission-Critical Communication Solution

CommX provides responders a tool that can be used to rapidly establish and manage response teams and share intelligence in real-time with individuals or across agencies, either in response to an incident or in everyday operations.

Built for public safety, the easy-to-use design enables users to rapidly visualize and share critical information, allowing them to respond more quickly, safely and effectively.

CommX is used for day-to-day operations for:

- Specialized tactical and emergency response which involve multiple units
- Special event and disaster management
- Any operation requiring team coordination, or data collection and sharing

Operational Management

- The command center manages security operations efficiently with coordinated **mission dispatch** and live updates.
- **Mapping services** provide real-time situational awareness and task assignments with robust GIS

Secured Digital Collaboration

- **Secure voice and video calls** with end-to-end encryption.
- **Scalable PTT** channels for instant communication.
- **Advanced chat** functionalities with media sharing, group chats, and screen sharing capabilities.

Streaming & Investigation

- Comprehensive recording and streaming **video, audio and Metadata**.
- Investigation platform utilizing **AI capabilities** such as context search, face recognition, speaker verification, STT, and sound recognition.
